Dear Mark Wooldridge and Texas Department of Transportation,

As a local resident, and concerned citizen, I am writing you today to offer my enthusiastic support for the HGAC proposal submission to improve bicycle and pedestrian infrastructure along NASA Parkway. The proposed improvements have the potential to increase safety for commuting and recreational cyclists and pedestrians as well as other road users - creating a robust east-west connection between residential and business areas on Clear Lake.

NASA Parkway is a major thoroughfare in the greater Clear Lake region, and is the only direct connection between some of the local municipalities and other regional places of interest including businesses, shops, and schools. For folks like myself that use their bicycle to commute to work, school, local shops, or for family-friendly recreation, the current NASA Parkway infrastructure between Kirby and Space Center is unsafe and unfriendly. With average vehicle speeds ranging from 45-55 mph and an average daily traffic count of over 40,000 vehicles, those of us that are vulnerable road users need a better option. I believe that by providing safer, more accessible, more interconnected bikeways, we will significantly increase the number of people riding bicycles in the Clear Lake Area and enhance access to the health and wellness benefits biking delivers. This project will empower families to safely enjoy daily exercise together, make it more pleasant to to get to community amenities such as local parks, and improve conditions for people to bicycle to work.

Improving the bicycle accessibility of NASA Parkway is important to me and adds a much-needed, low-cost transportation option. With increased motor vehicle traffic, gridlock on our local streets and the associated impact on air quality, reducing car trips and increasing bicycle trips is in our area's best interest in many ways.

I look forward to Harris County Precinct 2 and the Texas Department of Transportation working together to make this project a reality for our area.

Sincerely,

Name: Jeffrey T. Reilly
