## 2. Web-based applications owned and maintained by Licensee

To access the H-GAC GIS Services REST directory to obtain URLs for GIS Services, visit the directory website below.

<http://gis.h-gac.com/arcgis/rest/services>

Click on the *Login* link in the upper right corner.

Once you are logged into the H-GAC REST directory using your Security Credentials, you can navigate the folders to find the REST service end points.

In order to access secured GIS Services provided to subscribers, you will need to establish a proxy server which your applications can utilize to pass your Security Credentials along with requests for REST services. Your proxy server must be secured and not allow unauthorized users to gain access to the H-GAC GIS Services your organization has been granted a License to access.
