The Texas Litter Database: Supporting Cleaner Waterways and Coastlines

Kirsten Sorensen

Research and Cleanups Program Manager, Keep Texas Beautiful

Texas Litter Database History

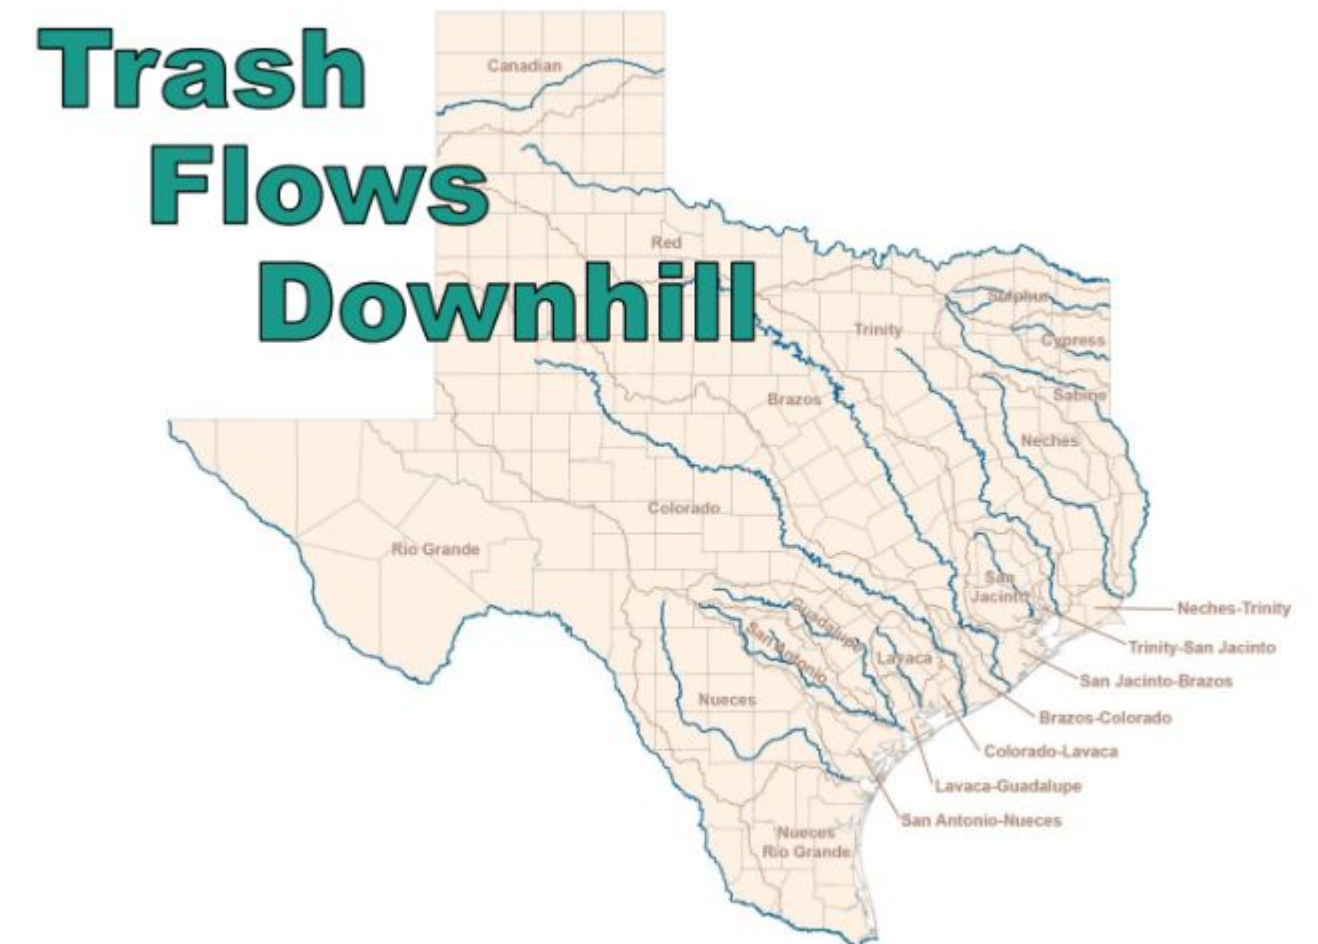

Keep Texas
Beautiful

The Texas Litter Database was created in partnership by Keep Texas Beautiful, HARC, and Black Cat GIS with funding from the Garver Black Hilyard Family Foundation.

It is the first statewide litter database of its kind.

Public data source that can be leveraged by communities in addition to provide evidence for policy and research.

Map: Texas Water Development Board

HARC

Litter In Our Waterways

Keep Texas
Beautiful

- **5.7 million pounds** of identifiable litter from 3,448 individual cleanups have been collected and reported to the Texas Litter Database in the last four years (February 2020 - June 2024 - **186,739** pieces of litter catalogued)
- Texas contains a vast array of waterways that all have the potential to carry litter to the 367 miles of coastline along the Gulf of Mexico
- Texas has more marine debris and litter along its waterfront than any other state in the nation
- **72%** of reported Texas litter is composed of plastic

Economic Impact of Litter

Keep Texas
Beautiful

Cost of Litter Cleanups

Litter removal can be labor intensive and costly

Damage to Infrastructure

Block drainage, increase flooding risk, damage pipes and culverts

Reduction in Tourism and Recreation

Less attractive destination, impacting local businesses

Economic Impact of Litter

Keep Texas
Beautiful

Impact on Industry

Agriculture, commercial fishing, etc relies on clean water

Public Health

Contamination in our water is a public health risk

Why Data Collection Matters

Keep Texas
Beautiful

Provides concrete, actionable evidence that helps us identify problems and potential solutions

- Track litter hot spots in your community
- Conduct litter audits to determine the composition of the litter in that area (and compare to standardized statewide totals)
- Track trends over time, including measuring efficacy of any given solution

The New Texas Litter Database

Keep Texas
Beautiful

1. Conduct a cleanup in your area
2. Use [Survey123](#) to share your data
3. View data from other cleanups in the [Charts](#) and [Maps](#)
4. See success stories in **Story Maps**
5. Use those data points to implement solutions

Texas Litter Database

Survey123: Trash Reports

Enter information about your cleanup: who conducted the cleanup, location and weight of trash, and notes about the site

Survey123 is a simple web form with no account or log in that is optimized for mobile use, simple and easy to use (even in the field!)

The screenshot shows a mobile web form titled "Texas Litter Database" with a green header. Below the header is a text input field with the placeholder "Enter your event data for trash cleanups here". The form is divided into sections by vertical lines. The first section is "Contact Information" with a dropdown arrow. It contains three input fields: "Organization Name", "Contact first and last name*" (with an asterisk indicating it is required), and "Contact Email:*" (also with an asterisk). The form is displayed on a light blue background.

Dashboard: Cleanup Maps

Now, anyone in the state of Texas can see exact details and data on where your cleanup took place

You can use this tool to track your cleanups, include data submitted by other groups in your county, and compare with what's being found in any region in the state at any time

STOP Audits

Keep Texas
Beautiful

STOP (Study, Track, remOve, and Prevent) Audits provide the best quality data

Measure a sample cleanup area, pick up every piece of trash in sight, take a detailed inventory of what you find

1. Categories include hard and solid plastics, polystyrene, rubber, glass, metal etc
2. Audits can be carried out in any size sample area
3. Results from litter audits across Texas have been standardized to show expected trash types in 500 sq meters

Examples: any "hard" plastic that is not styrofoam or plastic film

Item	Tally	Total #
6 pack rings		
Beverage Bottles/ Containers		
Bottle/ Container Caps		
Buoys and Floats		
Cigar plastic tips		
Cigarette butts		
Disposable lighters		
Fishing Lures and Line		
Food Containers		
Fragments		
Non-Food Containers		
Personal care products		
Plastic Cups/ Plates		
Plastic Rope/net pieces		
Plastic Toys		
Plastic Utensils		
Shotgun Shell Casings		
Straws		
Other:		

Hard and Solid Plastic

STOP Audits

Expected Trash Items per 500 Square Meters

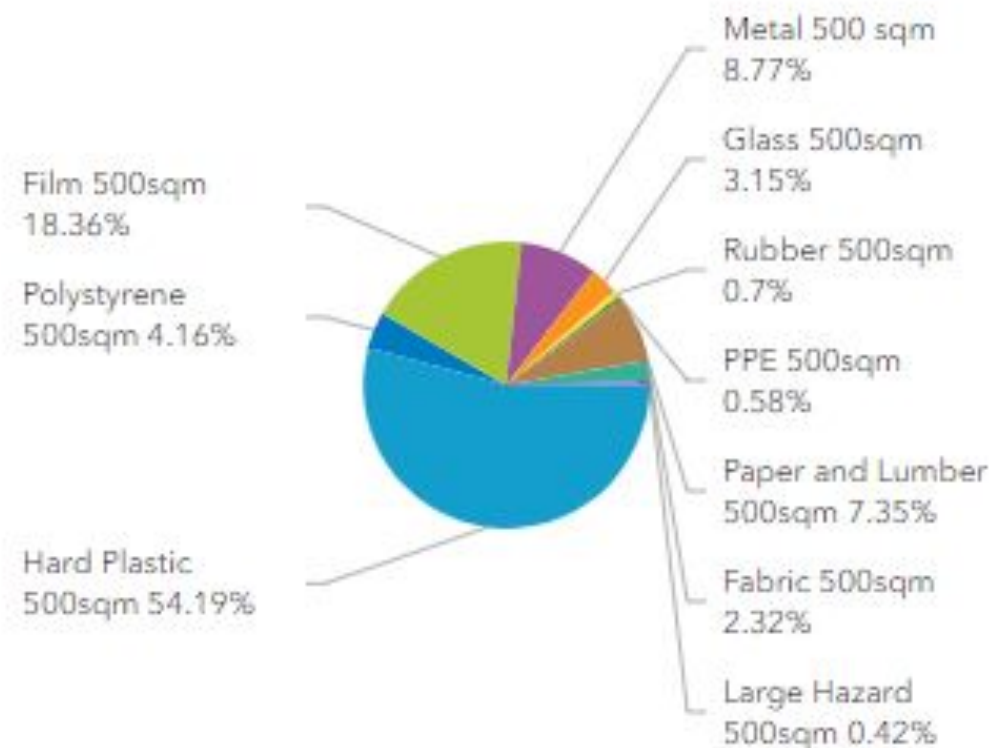

Select a date range
All data shown

Select a county

No category selected

These numbers are calculated by dividing reported counts on surveys by the total area surveyed and then multiplying by 500. Items on detailed surveys are divided into major

Major litter category percentages of trash collected on detailed surveys averaged by 500 square meters.

Serial chart

Map

Survey123: STOP Audit

Use the information from your STOP Audit form to upload details about your litter audit

You'll submit location data, weight of trash collected, and share estimated fragments and individual counts of trash types found in your sample area

Survey/ Transect Site Information

Survey/ Transect Name*

If doing a repeated survey at a site, try to use the same name!

External Site ID

Is this an illegal dump site?

 Yes No

Is there a trash can visible from the survey location?

 Yes No

Problem → Solution

Keep Texas
Beautiful

Impact from Local → State Level

1. Targeted Educational Campaigns
2. Resource Allocation for Infrastructure
3. Engage Businesses
4. Data Points for Research and Legislative Support
5. Replicable Model

Tool for Civic Engagement

Keep Texas
Beautiful

Volunteerism & Litter Cleanups

1. Identify groups in your community interested in litter cleanups, or that are already conducting cleanups to team up (KTB Affiliates, Master Naturalists, corporations, etc)
2. Send them to KTB for support, education, and guidance (free cleanup supplies also available in exchange for data)
3. Value of volunteer time: \$33.49 an hour (2024)
4. Engage youth via [TEKS-aligned lesson plans](#), Scout group opportunities, and more
