*Fixed, Terrestrial Non-Mobile
Internet Service*

- Detailed Service Areas
- FCC Service Availability

Published December 18, 2020

Broadband data displayed on this map are developed from a combination of direct provider outreach and data collection, FCC Form 477 broadband deployment filings, and independent research conducted by Connected Nation Texas. If a broadband provider was unwilling or unable to supply granular data and a detailed service area could not be developed, the provider's service availability is represented by FCC Form 477 data, a format which tends to be overstated. This map is not a guarantee of internet service availability. Mobile and satellite services may also be available.

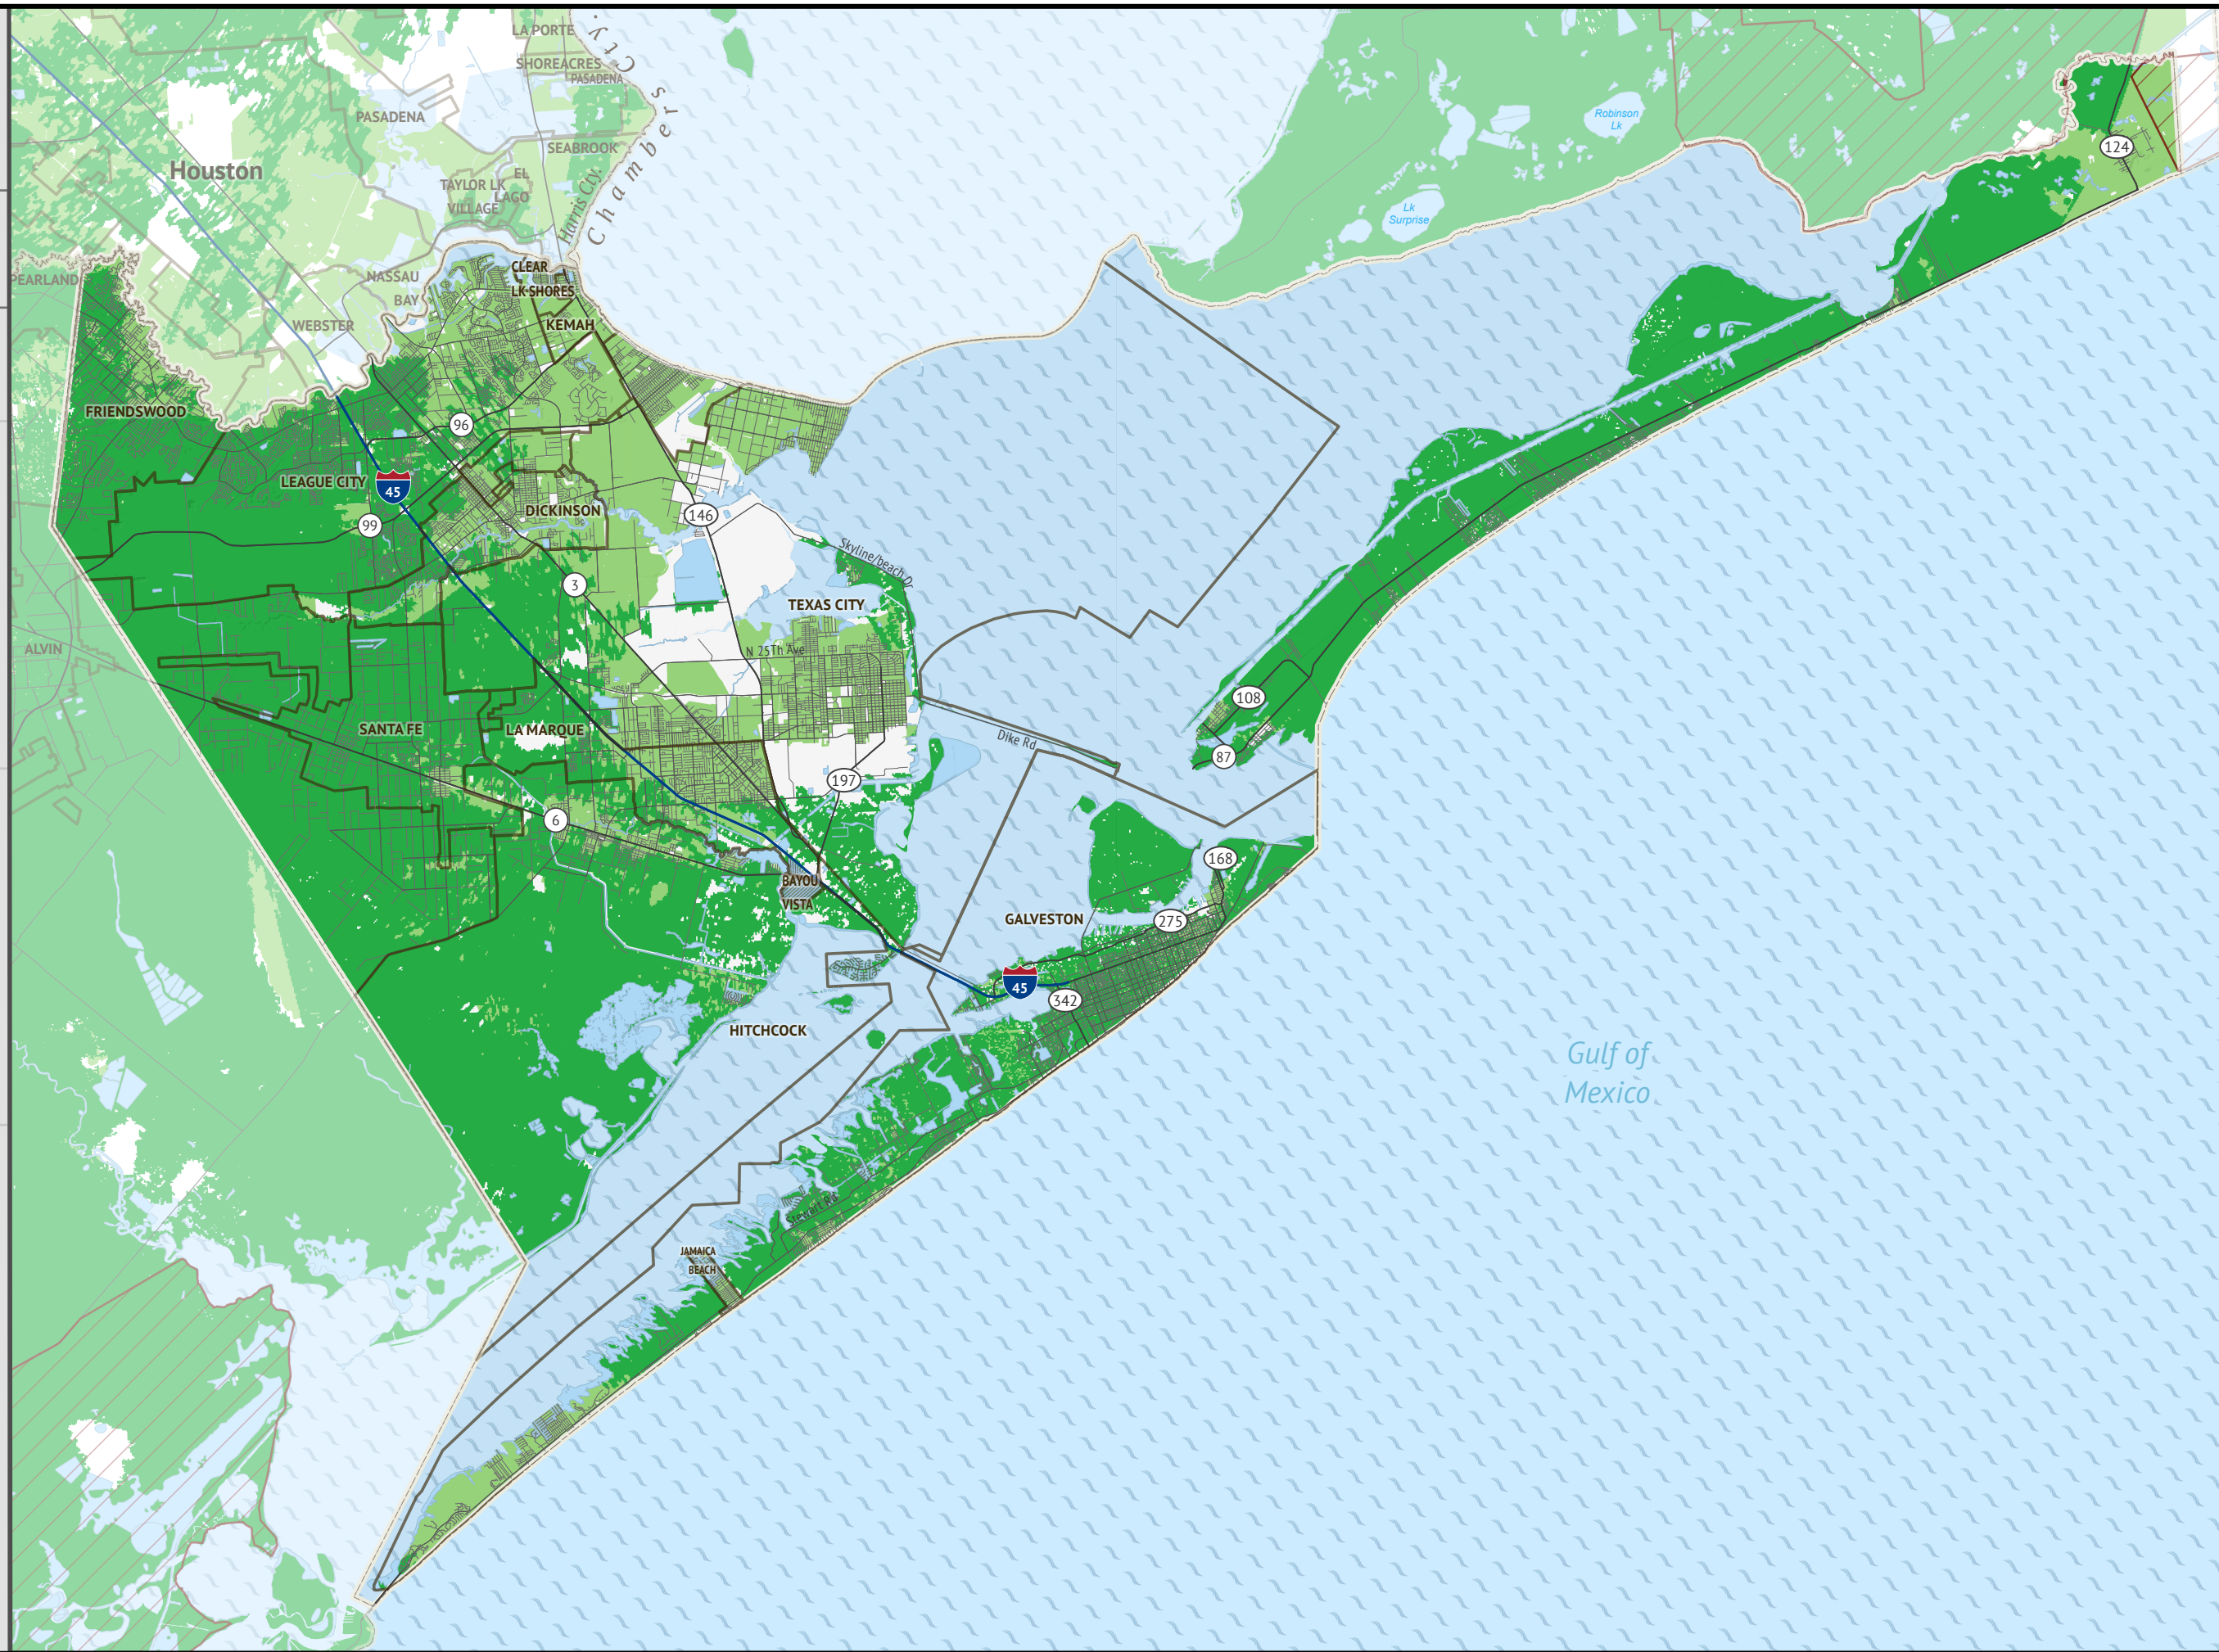

The current FCC definition of broadband is a minimum speed of 25 Mbps (Megabits per second) download and 3 Mbps upload.

Please submit feedback regarding any possible mapping inaccuracies at <https://connectednation.org/texas/feedback>. Updates to this map will occur in July 2021.
