

6. Safety Performance Measures

BACKGROUND

The Federal Highway Administration requires an annual submission of safety performance measures by state department of transportation and metropolitan planning organizations. The five federal safety performance measures are listed below.

1. Number of fatalities
2. Rate of fatalities (per 100 million vehicle miles traveled (VMT))
3. Number of serious injuries
4. Rate of serious injuries (per 100 million vehicle miles traveled)
5. Number of non-motorized fatalities and serious injuries (pedestrians and bicyclists).

The Houston-Galveston Area Council uses a methodology of a five-year rolling average to determine safety performance measures. The data used to determine the measurements are derived from the Fatality Analysis Reporting System (FARS) and the Texas Department of Transportation (TxDOT) Crash Record Information System (CRIS) data.
