# Welcome.

**The Houston-Galveston Area Council is the thirteen-county Council of Governments serving as a regional planning organization for the Houston-Galveston area of the Upper Texas Gulf Coast.**

**Justin Bower  
Principal Planner  
Houston-Galveston  
Area Council**

# Background – Hurricane Harvey Response

- Hurricane Harvey caused unprecedented damage to the Houston-Galveston Area Council (H-GAC) region
- Federal response included a 2018 allocation of \$130M in Community Development Block Grant-Disaster Recovery funds for Local Infrastructure projects through the Department of Housing and Urban Development (HUD)
  - Separate from recent 2022 CDBG-Mitigation discussions
  - Texas General Land Office (GLO) manages these funds
  - H-GAC helped GLO determine how these funds should be allocated in our region

# Background – Developing a Method of Distribution

- H-GAC worked with local governments and community members to develop a **Method of Distribution (MOD)** for these Local Infrastructure funds. The MOD is a plan that:
  - Allocates funding to eligible entities (cities and counties)
  - Sets eligible uses (flood infrastructure, utilities, etc.)
  - Describes requirements for the funding (70% Low-and-Moderate Income population benefit, etc.)
- Harris County and Houston got separate allocations; GLO did not include them in this MOD.

# Reallocating Unused Funds

- When it approved the MOD, the H-GAC Board agreed on a method for reallocating potential declined/de-obligated funds
  - Reallocation methodology was not formally approved or disapproved by GLO; not part of MOD yet
- \$2.3 million in funds were declined or de-obligated from 10 communities and now need to be reallocated
- H-GAC needs to formally amend the MOD to reallocate these funds, using the Board's previously agreed-upon reallocation methodology

# Reallocation Methodology

- Funds declined or de-obligated would first be offered to the city's respective County
- If one or more of the Counties declined the funds, they would subsequently be offered to an established hierarchy of local governments
- The hierarchy was prioritized by the percentage of units claiming damage within their identified damage area (minimum of 5,000 units damaged)
