

Road and Bridge Condition Form

The RTP Project Development Process requires project sponsors to successfully address at least three RTP goals before a project can be deemed RTP-eligible. A project deemed RTP-eligible can be added to either the fiscally constrained RTP project list, or the Illustrative list. The RTP Goal *Achieve and Maintain a State of Good Repair* can be addressed by successfully answering any of the three criteria in the below table:

Criteria: RTP Goal <i>Achieve and Maintain a State of Good Repair</i>
1. Does your project help achieve and maintain good condition for roads and/or bridges?
2. Does your project help achieve and maintain good condition of transit facilities and/or equipment?
3. Does your project help achieve and maintain a state of good repair in other ways?

Please fill out the road condition form below:

Road and Bridge Condition Statistical Measurements

PASER Rating

International Roughness Index (IRI)

Road and Bridge Condition Focused Narratives

Facility Type, Overall Existing Condition, and Description

Facility Age and Most Recent Maintenance (year and associated work)

Average Annual Daily Traffic (AADT), truck volume, or other current/projected traffic metric

Presence in Asset Management Plan, or other similar maintenance plan or document.

Facility Drainage Condition and Description / Bridge Erosion Condition and Description

Resiliency Focused Narratives

Is facility vulnerable to flooding? Will project help to alleviate flooding? If so, how?

Does project result in a more resilient facility? If so, how?

Please provide other pertinent information that can support your submission.
