

9. FEDERAL FUNCTIONAL CLASSIFICATION SYSTEM UPDATE

**BACKGROUND**

---

The Federal Functional Classification System (FFCS) provides a framework for identifying the role of a roadway in moving vehicles through the network of highways. The FFCS groups roadways into seven categories according to the service they are intended to provide: Interstates, Other Freeways & Expressways, Other Principal Arterials, Minor Arterials, Major Collectors, Minor Collectors, and Local Roads. The FFCS is used in determining the eligibility of funding under the Federal-aid program.

**CURRENT SITUATION**

---

The Texas Department of Transportation (TxDOT) Beaumont and Houston Districts are requesting to add the following two roadway segments to the Federal Functional Classification system. (Please see the attached documents from TxDOT [here](#) for more information, including maps.)

*Hatcherville Rd From FM 1942N to Liberty C/L:* Update FFCS to add Hatcherville Road in Chambers County from FM 1942 N to Liberty County Line (C/L) as a Major Collector facility.

*IH 10W (Eastbound and Westbound) Frontage Roads between FM 359 and Cane Island Parkway:* Update FFCS to add IH 10W Frontage Roads eastbound for 4.0 miles from FM 359 to Pederson Road as well as westbound for 5.56 miles from the Waller County/Fort Bend County Line to FM 359 as Major Collector facilities.

**ACTION REQUESTED**
