

EMPLOYER SURVEY RESULTS

Background

The COVID-19 pandemic has impacted the Houston-Galveston MPO region's transportation in many ways, including changes in traffic patterns, transit ridership, bike activity, telework and more. Understanding these changes and their impact from an employer perspective can be helpful for land use and transportation planning.

Current Situation

From December 2020 to January 2021, H-GAC's Commute Solutions and Workforce Programs and the Community and Environmental department worked with external partners, including management districts and local transportation agencies, to distribute an employer survey related to the impacts of COVID-19. The survey requested information from employers on impact on operations due to COVID-19, business practices concerning telework prior to COVID, and their outlook on telework, office space and the commute in 2021. The results of the survey are available at datalab.h-gac.com/employersurvey.
