

Harris County - Countywide Planning Documents

Harris County Transportation Plan

The Harris County Transportation Plan (CTP) is a long-range planning document that guides future transportation projects, programs, policies, and advocacy for all unincorporated Harris County through 2040. It addresses all parts of Harris County's complex transportation system, including the capital, operating, and maintenance activities for all transportation modes.

Vision Zero Action Plan

Harris County adopted the international Vision Zero movement's philosophy that traffic deaths are preventable, and that human error needs to be factored into our decision-making process. The Vision Zero Action Plan includes both engineered and non-engineered solutions and includes an implementation plan that includes short-term, medium-term, and long-term initiatives to reach the Plan's goals. Each initiative will include interim targets and timelines, and performance measures.

Harris County Flood Resiliency Plan

This countywide Flood Resilience Plan is under Phase 2 of the 3-phase planning process. The plan explores flood risk and possible flood risk reduction solutions for Harris County. Potential solutions may include, but are not limited to, channel conveyance improvements, construction of stormwater detention basins, or bridge adjustments or replacements. The plan includes extensive stakeholder engagement through Infrastructure Resiliency Team (IRT) and Community Flood Resilience Taskforce (CFRTF).
